

Table 2.- Series of African trypanosomiasis treated with diminazene, in humans

Author, year	Patients	Disease, dosage	Evolution	Adverse effects
Hutdhinson, 1962	17*	ET, 2 mg/Kg/day	One relapse	Albuminuria
Bailey, 1968	28	TME; a pre-melarsoprol dose	Less reactive encephalopathy	
Onyango, 1970	28	ET, 5 mg/Kg/48 h	All cured	Not
Temu, 1975	57	ET, 5 mg/Kg/48 h	One relapse	Not
Abaru, 1984	99	ET, 5 mg/Kg/48 h		1% reversible coma 6% reversible PN

*Control group: 31 patients treated with pentamidine, who presented 2 relapses and neurologic deterioration. PN: peripheral neuropathy. ET: early-stage trypanosomiasis. TME: trypanosome meningoencephalitis
