

Figure 1: Evaluation of right atrial thrombus in Patient 4 with the use of multiple imaging modalities: A) Parasternal short axis view of TTE demonstrating RAT (red arrow) measuring 1.4 x 2.1 cm, B) Apical 4 chamber view on TTE demonstrating thrombus attachment to right atrial free wall C) Bicaval view on TEE showing multi-lobed appearance of thrombus D) 3-dimensional TEE view of multilobed, mobile thrombus E) and F) cardiac MRI demonstrating mobile thrombus in the right atrium, G) Apical 4 chamber view on transthoracic echocardiogram after 75 days of anti-coagulation showing resolution of thrombus. RA, right atrium; LA, left atrium; RV, right ventricle; LV, left ventricle
