

Table 2: Distribution of postoperative 24 hour analgesic requirement

Groups	Control	ACB-0.25	ACB-0.16	<i>p</i>
Patients requiring fentanyl in recovery room (n)	7	2	1	<i>0.024</i>
Rescue analgesic required patients in the first 12 hours (n)	5	2	2	<i>0.308</i>
Rescue analgesic required patients in the second 12 hours	3	1	2	<i>0.573</i>
Tramadol consumption in first 12 hours (mg)	156.5±21.58	46.5±31.33	65±34.4	<i><0.001</i>
Tramadol consumption in 13-24 hours (mg)	53±25.36	16.5±28.7	15±21.15	<i><0.001</i>
Tramadol consumption for 24 hours (mg)	209.5±23.27	63±42.06	80.5±36.63	<i><0.001</i>

Data are expressed as mean ± standard deviation or number. p values were italicized and p values that are written in bold represent statistical significance.
