

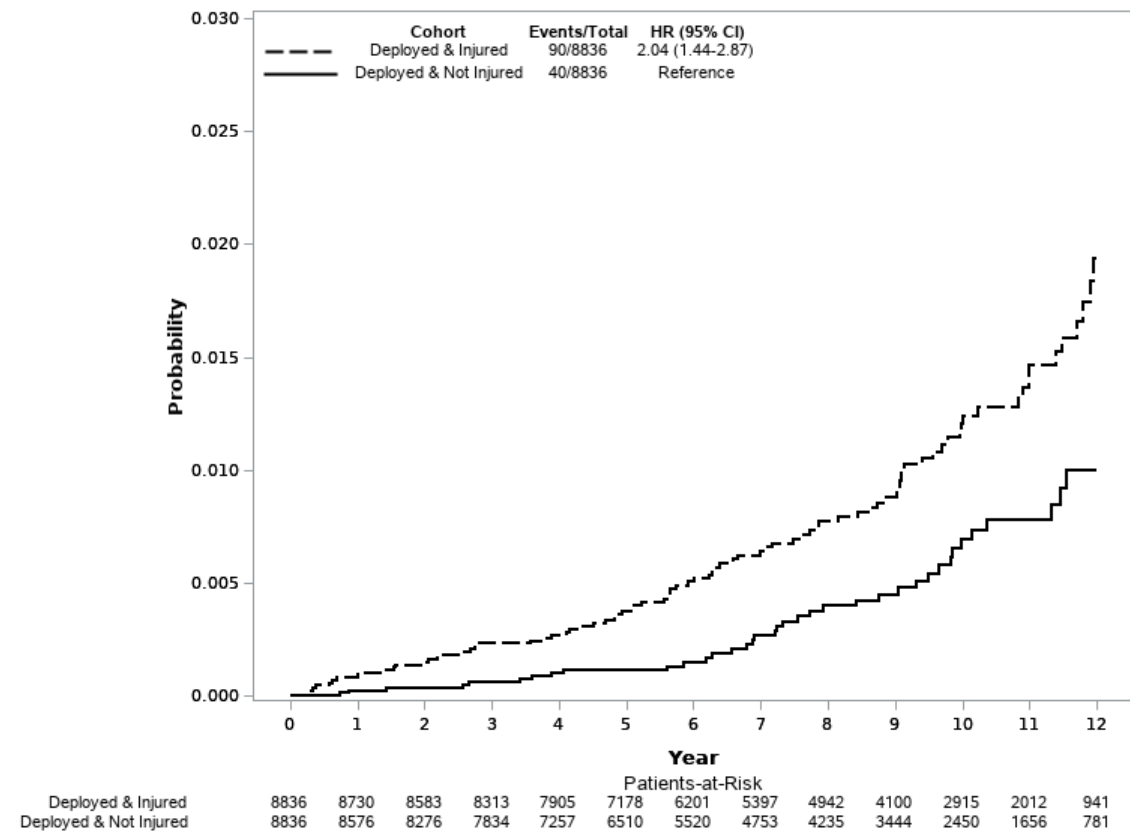

Figure 1. Comparison of the Estimated Unadjusted Incidence Rates of Estimated Atrial Fibrillation and Atrial Flutter Between Injured and Non-Injured Deployed Service Members (n = 17,672).

Note: The health records data were presented for atrial fibrillation and atrial flutter from February 1, 2002 – June 14, 2016 among deployed servicemembers (n = 17,672). Unadjusted cumulative incidence curves were plotted for injured (broken line) and non-injured (solid line).
