## Contents of this file

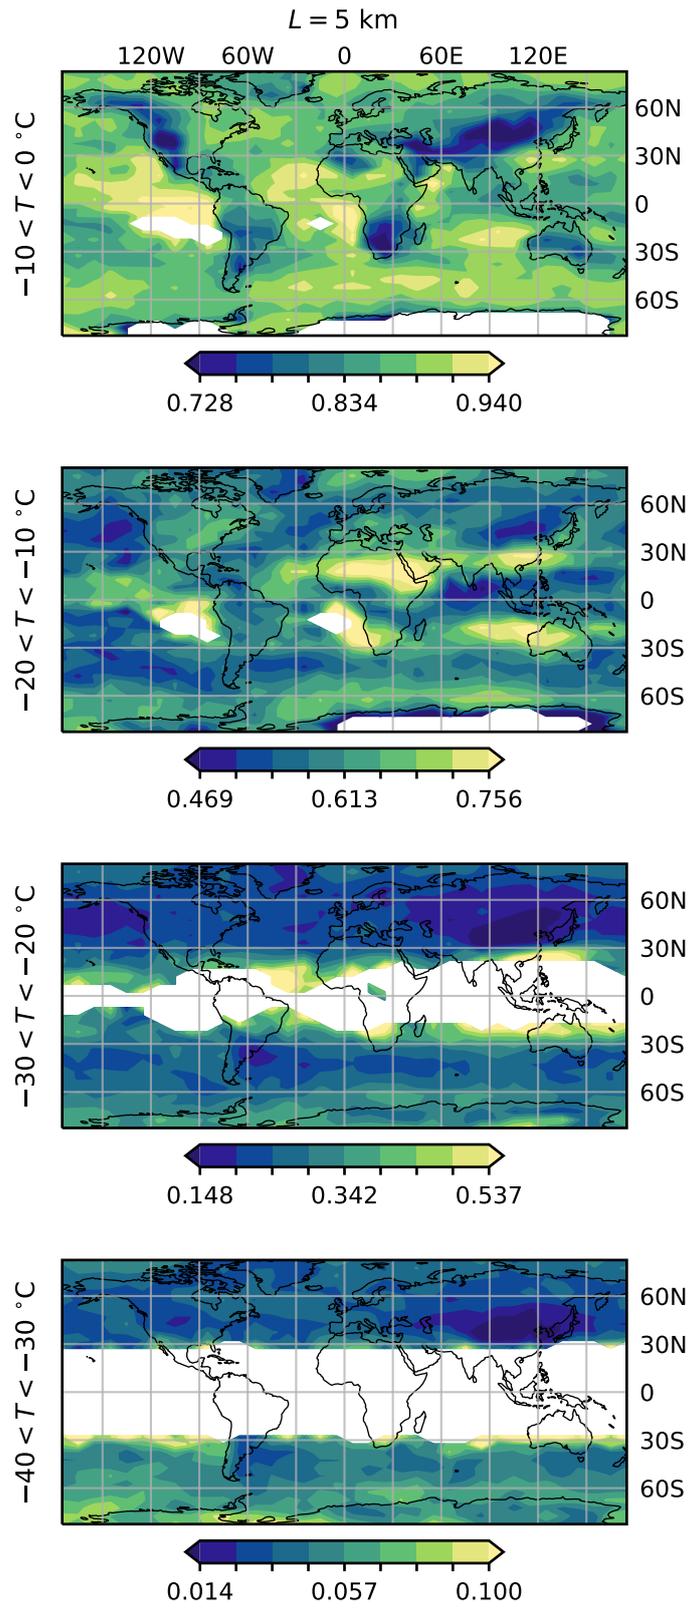

1. Figures S1 to S4

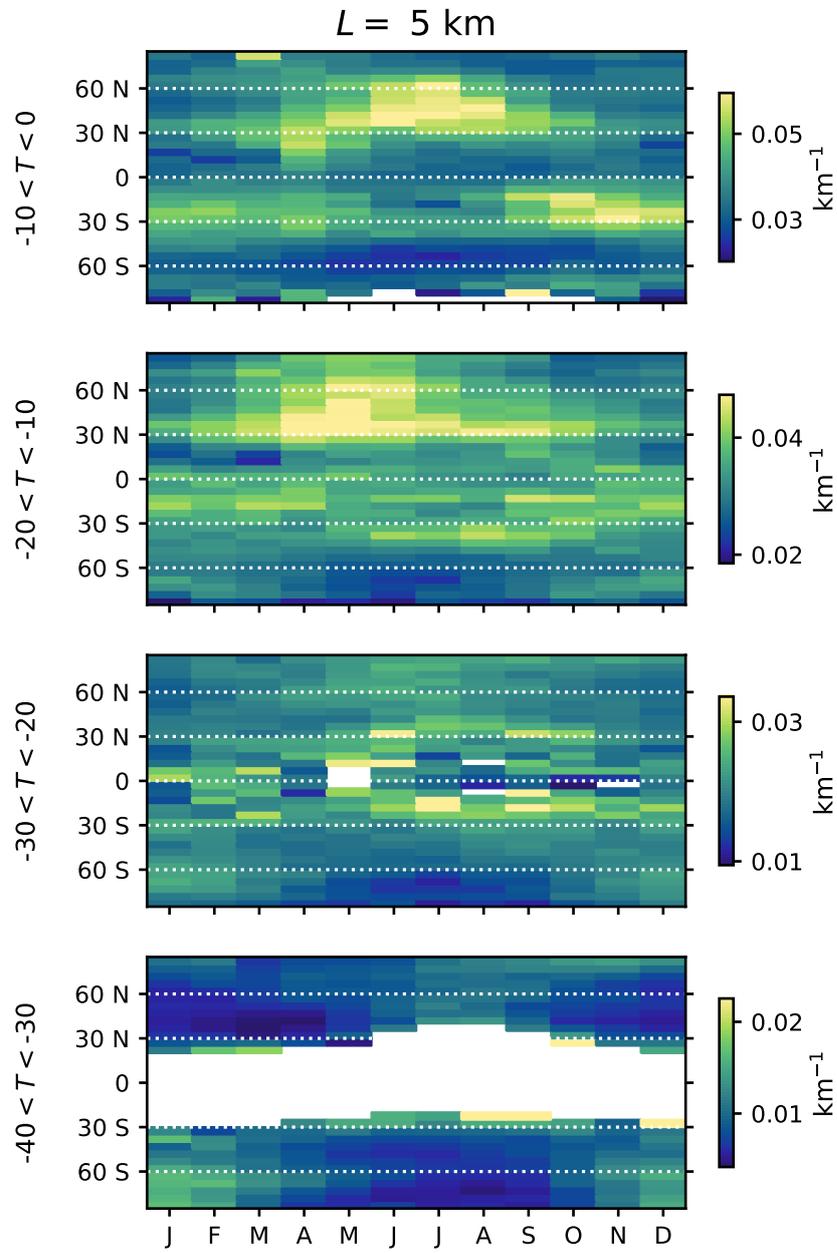

**Figure S1.** As in Figure 4 but for  $L = 5 \text{ km}$ .

**Figure S2.** Mean LCF binned by temperature (rows;  $10^{\circ}\text{C}$  bin width) for  $L = 333 \text{ m}$  (left) and  $1 \text{ km}$  (right). Values are only shown for grid boxes containing  $2 \times 10^4$  or more cloud phase retrievals over the 3-year study period. Color scales vary for each map to highlight spatial variability.

**Figure S3.** As in Figure S2 but for  $L = 5 \text{ km}$ .

**Figure S4.** As in Figure 5 but for  $L = 5 \text{ km}$ .
